I'm looking at buying a 2001 Chevy 2500 HD 4x4 with the Duramax and a 6spd for pulling the Taco and FJ60 around. The bad is that the oil pump is pumping at a very low psi, sorry I don't remember the numbers. I was wondering how difficult it is to change the oil pump and maybe the rod and crank bearings on a diesel.

~~Duramax oil pump.... | Pirate 4x4~~

Fuel Filter Housing Oring Leaks – The Duramax fuel system does not have any sort of low pressure fuel pump pushing fuel to the engine from the tank. The injection pump sucks all the fuel from the tank. While we are seeing more and more rusted out fuel lines causing the engines to suck air, nine times out of ten the issues are in the fuel ...

General Motors' 3.0L Duramax flaunts water-to-air intercooling, highly-advanced, 36,000-psi high-pressure common-rail fuel injection, a variable intake manifold and the only inline-six architecture in the half-ton diesel segment. However, this cutting-edge, cast-aluminum block and head I6 is much more than the sum of all its fancy parts.

~~Is the 3.0L Duramax Living Up To the Hype? | DrivingLine~~

HI! something is not right . if you installed the pump as you stated with the groove parallel to crankshaft with with narrow part towards the outside of engine or tractor as book states then the problem has to be with the installation of the distributor. if everthing is off by 90 degrees, it has to be IMHO the installation of the distributor.

If the valve is absent, the oil supply passages inside the engine lose their oil. It will take a few seconds for the oil pump to fill the supply passages back up after the engine starts. Expect that problem to be worse in the mornings, after the car sits overnight. Install the correct oil filter and the problem should be fixed. Simple.

This one is specific to the LML code Duramax produced between '11-'16, which used the Bosch CP4.2 high-pressure fuel pump (vs. the predecessor CP3 found on LB7, LLY, LBZ and LMM engines). Unlike the ultra-durable CP3 that came before it, the CP4.2 doesn't possess the same track-record for reliability.

~~Diesel High Pressure Oil Pump | Standard Diesel~~

Unfortunatley, the design of the Duramax Diesel oil pump does not allow an easy way to do this. Since the oil pumps on Duramax Diesel engines drive of the crank snout, the oil pump can't turn seperately from the rest of the engine. Therefore, it is not possible to use a drill operated tool on the the distributer gear of older GM V8s.

~~X Prime Standard Duramax Diesel Oil Pump Primer | MDR Tuning~~

The Duramax diesel is susceptible to fuel starvation and getting air in the fuel lines. This can be contributed to the fuel filter housing design and the fact that the Duramax does not use a lift pump. Rather, the high pressure fuel pump (injection pump) is responsible for vacuuming fuel from the tank.
