Punnett Squares Answer Types. Blood Types and Punnett Squares Using a Punnett square is a great way to figure out a child's possible blood types based on the parents' blood types. A Punnett square is just a diagram that helps to organize all of the genes to figure out the likelihood for a certain ...

Online Library Blood Type And Advanced Punnett Squares Answer

Blood Type And Advanced Punnett
Squares Answer

The A and B are dominant, and O is recessive. So allele A combined with allele O is type A. Similarly, BO is type B, AA is type A, BB is type B , OO is type O, and AB is type AB. If both parents have

Online Library Blood Type And Advanced Punnett

type A blood, then the alleles could be AA or AO, thus the allele A frequency is 75%, allele O frequency is 25% for both parents.
