The two discrete structures that
we will cover are graphs and
trees. A graph is a set of points,
called nodes or vertices, which
are interconnected by a set of
lines called edges. The study of
graphs, or graph theory is an
important part of a number of
disciplines in the fields of

Graph Theory - Discrete Mathematics

In mathematics, and more specifically in graph theory, a graph is a structure amounting to a set of objects in which some pairs of the objects are in some sense "related". The objects correspond to mathematical abstractions called vertices and each of the related pairs of vertices is called an edge.

Typically, a graph is depicted in diagrammatic form as a set of dots or circles for the vertices, joined by lines or curves for the edges. Graphs are one of the objects of study in discrete mathemati
