Intro to Object
Oriented

Programming
(OOP)

Fundamentals

Object Oriented

Programming Java

Objects in Java.

To create an

Online Library Fundamentals

Object Oriented

(instance) of a particular

class, use the new operator,

followed by an invocation of a

constructor for that class, such

as: new MyClass

() The

constructor

method

initializes the

Online Library Fundamentals

state of the new object. The new operator returns a reference to the newly created object.

Fundamentals of

Online Library Fundamentals

Object-Oriented
programming.

Object-oriented
programming is a
programming
paradigm where
everything is
represented as
an object.

Objects pass
messages to each
other. Each
object decides
what to do with

Online Library Fundamentals

Object Oriented
message. OOP
focuses on each
object's states
and behaviors.

What Are
Objects? An
object is an
entity that has
states and
behaviors. For
example, dog,
cat, and
vehicle.

Object Oriented
Programming
Using JAVA |
Udemy

Duration. 1h
59m.

Description.

Online Library Fundamentals

Simply using an OO language like Java does not make your program object oriented. In fact, when used incorrectly, OO-language features can make your program bloated, overly complex, and impossible

Online Library Fundamentals

to maintain.

This course,
Java

Fundamentals:

Object-oriented
Design, teaches
you how to write
effective produc
tion-quality OO
systems by
leveraging the
basic principles
of good OO
design.

Tutorial -
Object Oriented
Programming in
JAVA ...

Online Library Fundamentals

It is a basic unit of Object-Oriented

Programming and represents the real-life

entities. An Object is an instance of a Class. When a class is defined, no memory is allocated but

Online Library Fundamentals

when it is
instantiated
(i.e. an object
is created)
memory is
allocated. An
object has an
identity, state,
and behavior.
