psychologists aim to explain how thinking, feeling, and behaviors change throughout life.

Developmental psychology - Wikipedia
Lifespan developmental psychology or lifespan psychology deals with the study of individual development (ontogenesis) as it extends across the entire life course. Influenced by evolutionary perspectives, neofunctionalism, and contextualism, lifespan psychology defines development as selective age-related change in adaptive capacity (Baltes 1997).

life course. The field focuses on both intraindividual ontogenesis (i.e., development within an individual) and interindividual differences in developmental trajectories.

Life Span Developmental Psychology |
SpringerLink

Prior to 1940, psychologists studying personality generally confined themselves to a limited segment of the life span. The period from 1850 to 1920 saw a good deal of empirical study of child and adolescent development, but almost no attention to adulthood and later maturity.
