Solution: When p is true and q is false, then $p \wedge q$ is true, $q \wedge p$ is true and $p \wedge (\neg q)$ is true. (Therefore, both p and $\neg q$ are true) Here, $p \wedge q$ is not true as a true statement cannot imply a false statement. Question 4: $\sim (p \wedge q) \wedge (\sim p \wedge q)$ is equivalent to _____.

~~Mathematical Reasoning— Mathematics Learning~~

Logical and mathematical reasoning is key to knowing mathematics and sailing through the world of practical math. Doing, or applying mathematical principles in real life is a creative act, and reasoning is the basis of that act. It is a very useful way to make sense of the real world and nurture mathematical thinking.

~~Reasoning: Identifying Opportunities (Article)~~

Reasoning in maths is the process of applying logical and critical thinking to a mathematical problem in order to work out the correct strategy to use (and as importantly, not to use) in reaching a solution. Reasoning is sometimes seen as the glue that bonds pupils' mathematical skills together; it's also seen as bridging the gap between fluency and problem solving, allowing pupils to use their fluency to accurately carry out problem solving.
