Turkish Bow Ottoman Bow Traditional Horse Bow Recurve Bow ...

The Turkish Bow: A Culmination. The Turks crafted the most sophisticated and powerful bows of the ancient world. They constructed their weapon from materials typical of Asiatic recurve bows – a wooden core, horn on the belly, and sinew on the back. However, the Turkish bow had the most extreme curvature because, when unstrung, the outer limbs would curve forward in a “ C ” shape and would often touch or overlap.

10+ Ottoman Turkish Bows Manufacture And Design Second ...

A composite bow is a traditional bow made from horn, wood, and sinew laminated together, a form of laminated bow. The horn is on the belly, facing the archer, and sinew on the outer side of a wooden core. When the bow is drawn, the sinew (stretched on the outside) and horn (compressed on the inside) store more energy than wood for the same length of bow.
