The Engine Compartment holds the entire engine body and parts with your vehicle. It is usually located in the front of the vehicle and not inside the cabin area itself for safety reasons. FCP Euro features an extensive online catalog of genuine, OEM and aftermarket replacement parts from a wide variety of quality manufacturers.

BMW Engine Compartment Parts | FCP Euro

The mid-engine, rear-wheel drive layout (abbreviated as MR layout) is one where the rear wheels are driven by an engine placed just in front of them, behind the passenger compartment. In contrast to the rear-engined RR layout, the center of mass of the engine is in front of the rear axle. This layout is typically chosen for its low moment of inertia and relatively favorable weight distribution.
